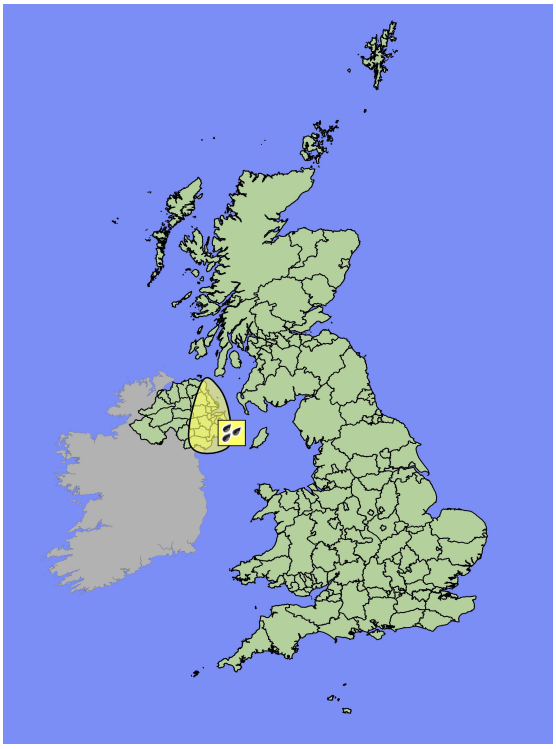
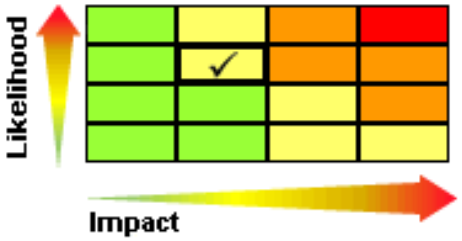
National Severe Weather Warning Service





Chief Forecasters Assessment
A deep depression currently developing over the eastern Atlantic will move slowly northeastwards across the UK on Friday and Saturday, bringing another period of very unsettled weather to many regions. The associated frontal zone will become slow moving across Northern Ireland during Friday, with further heavy showers to follow during Saturday. The largest rainfall totals are expected to be across the east of Northern Ireland with 15-30 mm falling quite widely and the possibility of 40-50 mm in the southeast.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:05 on Fri, 15th Jun 2012** until **23:59 on Fri, 15th Jun 2012**

Rain will become persistent and at times heavy during Friday, with the heaviest rain over more eastern parts of Northern Ireland. The rain will be accompanied by strong easterly winds. The public should be aware of the risk of localised flooding.
